

VOLCON

Energy & Security Solutions

Partners

A Bright & Secure Alternative

Volcon Energy is a Nigerian-owned company working to design and execute efficient solar energy and security solutions to enable families and businesses reduce their energy costs, cut down on their carbon emission, and actively secure valuable assets.

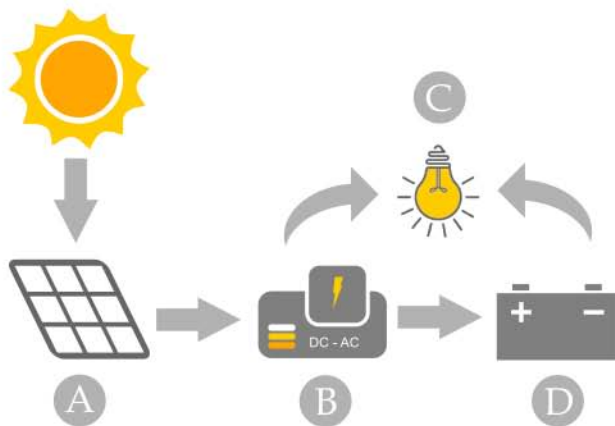

Strategic Alliances

In order to provide a holistic and integrated renewable energy and digital security solution, Volcon has partnered with renowned companies in these ecosystems.

Solar Energy

A. Sunlight activates the panels, producing electricity

B. Electricity passes through an inverter and is converted to usable power

C. The inverter sends power to your appliances

D. Electricity also passes through the batteries, storing power for use at night

Advanced Battery Technology

The future of energy storage relies on battery solutions that have greater capacity, a high-power potential, a longer lifespan, are sustainable and safe.

Arnergy uses Lithium Iron Phosphate (LiFePO₄) Batteries with the advantages of longer battery life, lower cost, positive environmental impact, and safety (stable and non-combustible).

Benefits to You

Reduce your energy bills

One of the biggest reasons to go solar is that you can eliminate or significantly reduce your electric bill, especially your generator fuel (petrol/diesel) cost

Increase the value of your property

Multiple studies have shown that homes with solar panel systems are valued and sold at prices above similar homes in their area

Improve your air quality & reduce noise pollution

Being less reliant on petrol/diesel generators will improve your air quality and reduce your exposure to the noise caused by these generators

Enjoy your uninterrupted convenience

Go about your day (or night) without having to rush to switch on your generator when an outage from the grid occurs

Product Offering

10-year life span with a 5-year warranty

Arnergy 5000

Arnergy 10000
